## **Standard equipment**

## Exhaust

Exhaust manifold protection Silenced muffler -15dB(A)

## Fuel Supply

Single wall daily tank with bunded base Automatic shutdown system for low fuel level Fuel gauge

### **Handling**

Base frame with anti-overturning forklift pockets Forkliftable on the short side

## Base Frame

Bunded base at 110% of fuel tank capacity Anti-vibrating mounting pads

## Engine

High coolant temperature and low oil pressure shutdown External oil drain points Engine liquids (oil and antifreeze) Tropicalized radiator Rotating parts protection

## Alternator

Avr automatic voltage regulator Impregnation for marine environment lp23

## Panel & connection

Emergency stop button Magnetothermal circuit breaker on alternator board Cable output from side lp44 wiring Start-up battery (pre-charged) Grounding point

# 

The QPE-C control panel represents the evolution of the panel for the control and management of the gen set. With its microprocessor logic it is able to meet any user requested features. The dual operation mode manual and automatic guarantees to every type of functionality protection, analysis and control of the generating set in order to make the management easy and efficient. Variant without transfer switch on board. ATS panel type QC as optional. The panel manages the QC panels directly or any other ATS panel.

### **PRP**

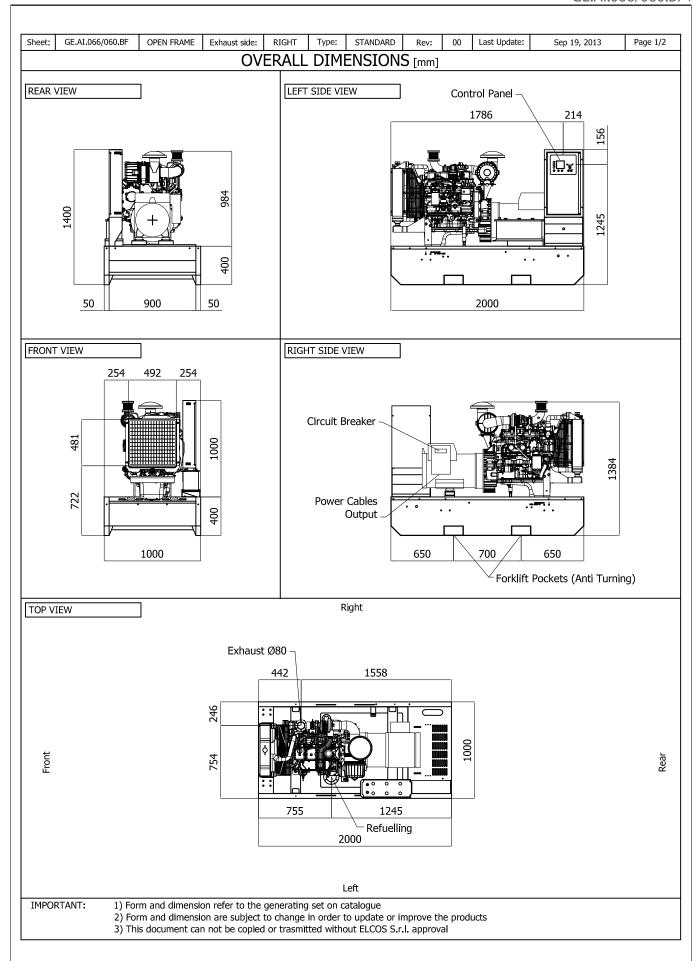

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

#### LTP

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.

### VENTILATION OF THE ROOM

The windows area in the generating set room needs to be (recommended):

Aspiration: 0.55 m2 Expulsion: 0.35m2

ATTENTION: for a correct ventilation, the expulsion air and the exaust gas needs to be conveyed in the open-air

IMPORTANT:

- 1) Form and dimension refer to the generating set on catalogue
- 2) Form and dimension are subject to change in order to update or improve the products
- 3) This document can not be copied or trasmitted without ELCOS S.r.l. approval
