

Generating Set PROFESSIONAL - Diesel

GE.BD.110/100.PRO+011

1500 rpm - Threephase - 50Hz - 400V Multifunction panel without switching on board

Image for demonstration purposes

Standard equipment

Canopy Soundproofing

Removable soundproof canopy Painting canopy (ral) in galvanized sheet steel Soundproofing with class 1 polyester material Handles with key lock and automatic closing Inspection doors for controls and maintenance Inspection doors with hermetic gasket

Exhaust

Exhaust rain cap Insulated exhaust pipes Internal residential muffler

Fuel Supply

Single wall daily tank with bunded base Automatic shutdown system for low fuel level Fuel gauge

Handling

N.4 lifting hooks integrated into the bearing structure Loadable side by side for truck transportation

Base Frame

Anti-vibrating mounting pads Anti pollution bunded base

Engine

High coolant temperature and low oil pressure shutdown system Engine liquids (oil and antifreeze) Tropicalized radiator Rotating parts protection Electronic speed governor

Alternator

Avr automatic voltage regulator Impregnation for marine environment Ip23

Panel & connection

Emergency stop button Tamperproof panel ip55 Cable output from the bottom lp44 wiring Start-up battery (pre-charged) Grounding point

Documentation

operating scheme - schema di funzionamento

QLE Multifunction panel without switching on board

The QLE command and control panel offers outstanding protection, monitoring and control for small and middle size generator sets. Elcos's control module MC2 offers advanced features to meet the most demanding on-site application. Elcos's control module MC2 is designed for offer an easy user interface. Variant with transfer switch on board. Switching made with a pair of contacts electrically and mechanically interlocked. The output line is protected by a breaker which protects from overload, short circuit.

PRP

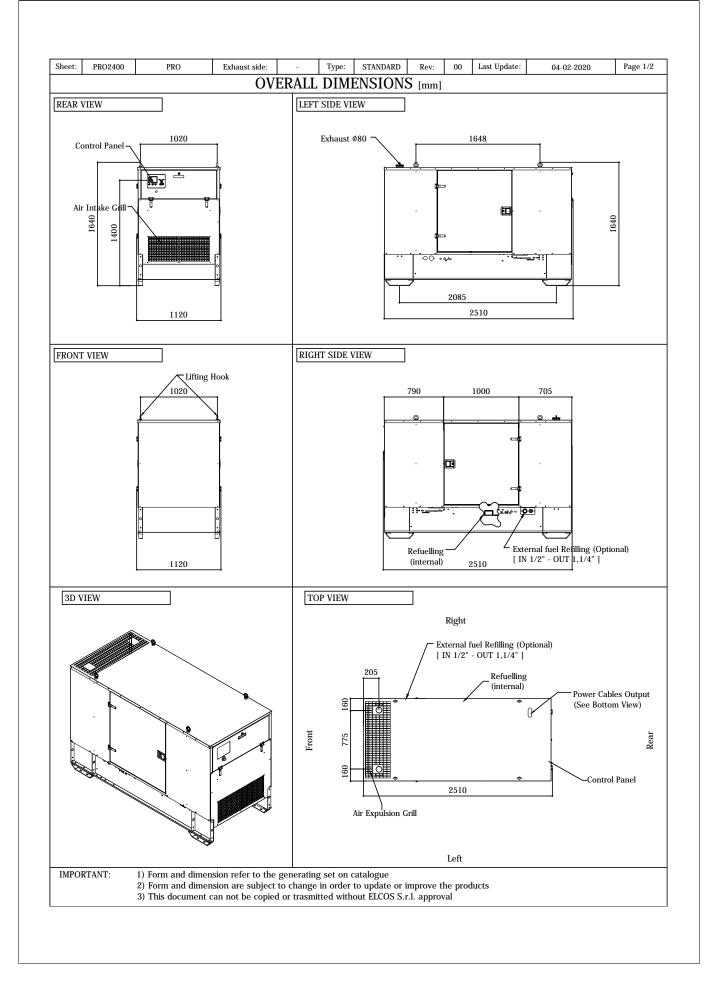

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

LTP

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.
