Image for demonstration purposes

Standard equipment

Exhaust Exhaust manifold protection Silenced muffler -15dB(A)

Fuel Supply **Fuel connections** Automatic shutdown system for low fuel level

Handling N.4 lifting hooks integrated into the bearing structure

Base Frame Anti-vibrating mounting pads

Engine

High coolant temperature and low oil pressure shutdown system Oil pressure and coolant temperature gauge (only with qpe or +14 variant) Engine liquids (oil and antifreeze) Tropicalized radiator Rotating parts protection Electronic speed governor

Alternator

Avr automatic voltage regulator Avr pre-arranged for parallel Three-phase sensing avr Impregnation for marine environment lp23

Panel & connection

Emergency stop button Magnetothermal circuit breaker on alternator board Cable output from side lp44 wiring Start-up battery (pre-charged) Grounding point

Documentation

Control Systems on board QPE-C-VSC-BF

$\ensuremath{\textbf{QPE}}$ Automatic panel without switching on board

The QPE-C control panel represents the evolution of the panel for the control and managment of the gen set. With its microprocessor logic it is able to meet any user requested features. The dual operation mode manual and automatic guarantees to every type of functionality protection, analysis and control of the generating set in order to make the managment easy and efficient. Variant without transfer switch on board. ATS panel type QC as optional. The panel manages the QC panels directly or any other ATS panel.

PRP

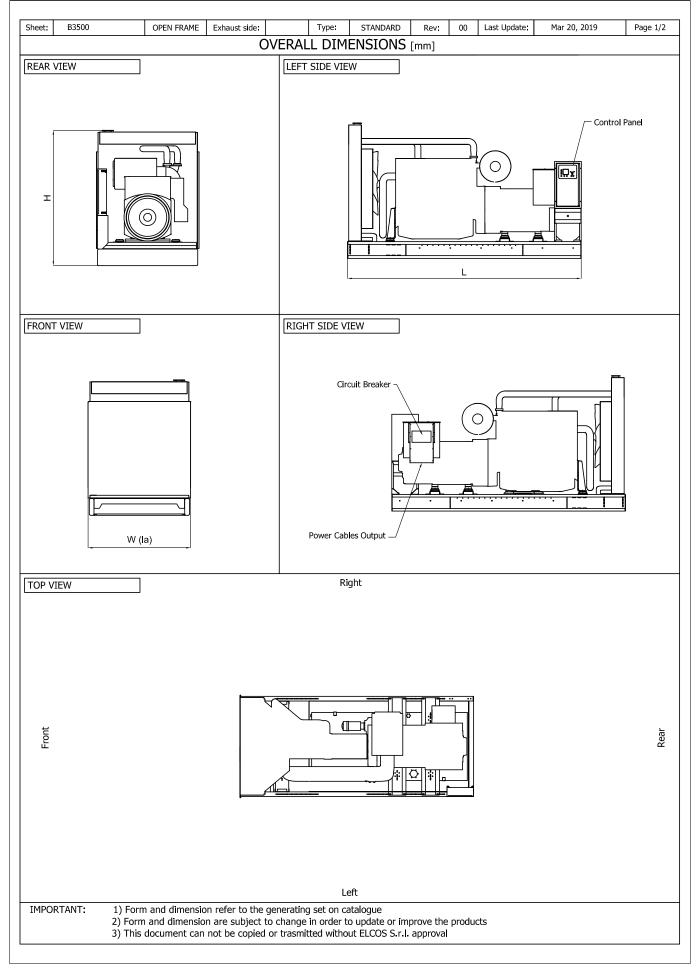

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

LTP

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.
