Generating Set SUPERSILENT - diesel

GE.DW.220/200.SS+011

1500 rpm - Threephase - 50Hz - 400V Automatic Panel with AMF without ATS

Standard equipment

Canopy Soundproofing

Soundproofing with class 1 polyester material Handles with key lock and automatic closing Special baffles for air intake and air expulsion Inspection doors for controls and maintenance

Exhaust

Exhaust rain cap Exhaust manifold protection Insulated exhaust pipes Internal residential muffler - 35dB(A)

Fuel Supply

Single wall daily tank with bunded base Automatic shutdown system for low fuel level Fuel gauge

Lifting hook integrated into the bearing structure Base frame with anti-overturning forklift pockets

Base Frame

Bunded base at 110% of fuel tank capacity Anti-vibrating mounting pads Battery compartment externally accessible for easy service

Engine

Engine pre-heater 230v

High coolant temperature and low oil pressure shutdown

Oil pressure and coolant temperature gauge (only with qpe or +14 variant)

External oil drain points Engine liquids (oil and antifreeze) Rotating parts protection

Electronic speed governor

Alternator

Avr automatic voltage regulator Impregnation for marine environment lp23

Panel & connection

Emergency stop button Magnetothermal circuit breaker on alternator board Tamperproof panel ip55 Cable output from side lp44 wiring Start-up battery (pre-charged) Grounding point

Control Systems on board QPE-C-VSC

operating scheme - schema di funzionamento

The QPE-C control panel represents the evolution of the panel for the control and management of the gen set. With its microprocessor logic it is able to meet any user requested features. The dual operation mode manual and automatic guarantees to every type of functionality protection, analysis and control of the generating set in order to make the management easy and efficient. Variant without transfer switch on board. ATS panel type QC as optional. The panel manages the QC panels directly or any other ATS panel.

PRP

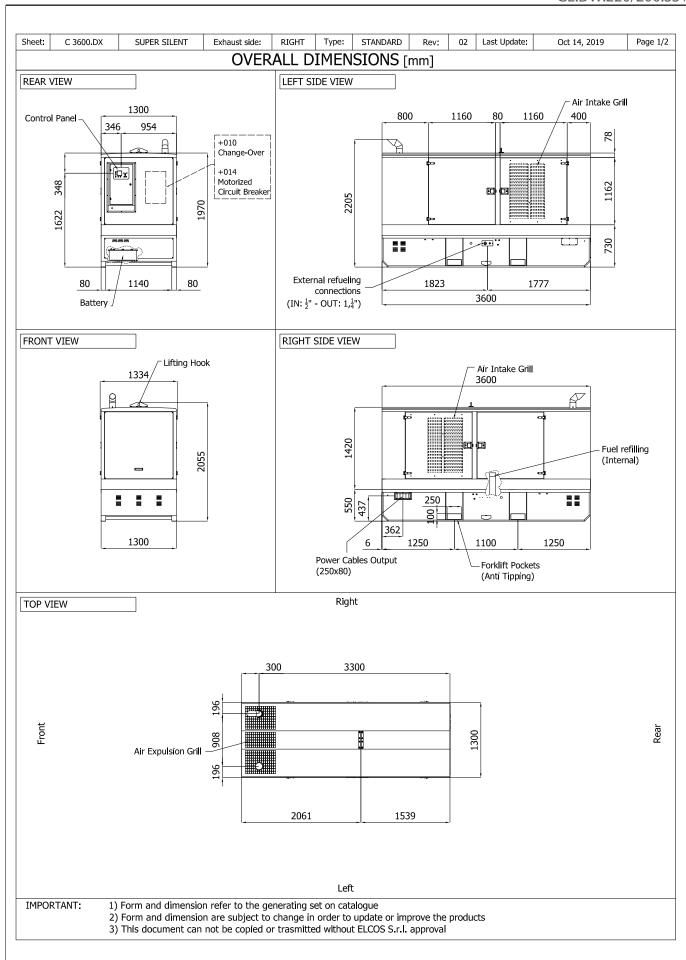

Engines of this rating provide unlimited hours of usage in a variable load application. The average load factor should not exceed 70% of the engine's prime power rating with a maximum number of 500 operational hours at 100% prime power rating. An overload capability of 10% is available, however, is limited to a period of 1 in every 12 hours

LTP

Limited-time running power is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500h of operation per year with the maintenance intervals. The overload is not allowed.
